NATO strike in Sirte area 20 October 2011

NAPLES – Now that NATO has had the opportunity to conduct a post strike assessment of yesterday's strike, we are able to provide a more comprehensive picture of events.

At approximately 08h30 local time (GMT+2) on Thursday 20 October 2011, NATO aircraft struck 11 armed military vehicles which were part of a larger group of approximately 75 vehicles manoeuvring in the vicinity of Sirte. These vehicles were leaving Sirte at high speed and were attempting to force their way around the outskirts of the city. The vehicles had a substantial amount of mounted weapons and ammunition, posing a significant threat to the local civilian population.

The convoy was engaged by NATO aircraft to reduce the threat. Initially, only one vehicle was destroyed, which disrupted the convoy and resulted in many vehicles dispersing and changing direction.

After the disruption, a group of approximately 20 vehicles continued at great speed to proceed in a southerly direction, due west of Sirte, and continuing to pose a significant threat. NATO again engaged these vehicles with another air asset. The post strike assessment revealed that approximately 10 pro-Qadhafi vehicles were destroyed or damaged.

At the time of the strike, NATO did not know that Qadhafi was in the convoy. NATO's intervention was conducted solely to reduce the threat towards the civilian population, as required to do under our UN mandate. As a matter of policy, NATO does not target individuals.

We later learned from open sources and Allied intelligence that Qadhafi was in the convoy and that the strike likely contributed to his capture.

NATO does not divulge specific information on national assets involved in operations.

NATO and Libya

Operational Media Update

25 October. Allied Joint Force Command NAPLES, SHAPE, NATO HQ

Mission

NATO took control of all military operations for Libya under United Nations Security Council Resolutions 1970 & 1973 on 31 March 2011. The aim of Operation UNIFIED PROTECTOR is to protect civilians and civilian-populated areas under attack or threat of attack.

The mission comprised of three elements: an arms embargo, a no-fly-zone and actions to protect civilians from attack or the threat of attack.

On 21 October 2011, after 204 days, the North Atlantic Council The Council agreed that the operations were very close to completion and took a preliminary decision to end the operation on 31 October 2011. The Council will take a formal decision this week. In the meantime, the Secretary General will consult closely with the United Nations and the National Transitional Council.

The Council agreed that NATO will wind down the operation, during which period NATO will monitor the situation and retain the capacity to respond to threats to civilians, if needed.

Our operations will involve intelligence, surveillance and reconnaissance missions and we will retain the ability to conduct strikes should the situation require us to do so.

It is not NATO policy to comment on intelligence matters or provide details on readiness posture. If NATO is required to act during this monitoring period it will detail these actions using this daily update.

Command and Control

NATO's operational commander for Operation Unified Protector is **Lieutenant-General Charles Bouchard** of the Canadian Air Force. His office and staff is located at the Allied Joint Force Command Naples.
